

# ***CM Advisors Family of Funds*** **Annual Report 2018**

## **CM Advisors Small Cap Value Fund** **CM Advisors Fixed Income Fund**

February 28, 2018

This report and the financial statements contained herein are submitted for the general information of the shareholders of the CM Advisors Family of Funds (the "Funds"). This report is not authorized for distribution to prospective investors in the Funds unless preceded or accompanied by an effective prospectus. Mutual fund shares are not deposits or obligations of, or guaranteed by, any depository institution. Shares are not insured by the FDIC, Federal Reserve Board or any other agency, and are subject to investment risks, including possible loss of principal amount invested.

We are pleased to present for your review the Annual Report of the CM Advisors Family of Funds.

**Summary highlights for the CM Advisors Family of Funds (the “Funds”) for the fiscal year ended February 28, 2018.**

- The CM Advisors Fund (CMAFX) merged via a tax-free exchange into the CM Advisors Small Cap Value Fund (CMOVX) on February 23, 2018.
- The CM Advisors Fixed Income Fund (CMFIX) outperformed the Bloomberg Barclays U.S. Aggregate 1-3 Year Total Return Bond Index by 0.28% during the fiscal year. However, it underperformed its primary benchmark, the Bloomberg Barclays U.S. Aggregate Bond Index, by 0.08% during the same period.
- CMFIX finished the fiscal year with the following Morningstar™ ratings in the Short-Term Bond Category, as further noted in Table 3.

Morningstar Rating Overall	479 Funds in the Category	★★★★★
Morningstar Rating 3 Years	479 Funds in the Category	★★★★★
Morningstar Rating 5 Years	438 Funds in the Category	★★★★★
Morningstar Rating 10 Years	376 Funds in the Category	★★★★★

- CMOVX underperformed its benchmark, the Russell 2000® Value Index, by 4.98% during the fiscal year.
- Investments in the Energy, Industrials, and Materials sectors were over-weight in both CMFIX and CMOVX during the fiscal year. We believe these sectors will likely continue to play an important role in each Fund in the year ahead.
- Given that each Fund has a large exposure to the Energy sector, and the fact that so many of the Fund’s Industrials sector stocks and bonds are tied to Energy, we believe it is appropriate to provide shareholders with a more detailed look at our energy investment thesis.

**CM Fixed Income Fund (symbol: CMFIX)**

For the fiscal year ended February 28, 2018, CMFIX generated the following trailing returns:

**Table 1**

<b>As of February 28, 2018</b>	<b>1-Year</b>	<b>2-Years</b>	<b>3-Years</b>	<b>5-Years</b>	<b>10-Years</b>	<b>Inception</b>
CMFIX	0.43%	4.12%	2.17%	1.64%	3.70%	4.70%
Bloomberg Barclays U.S. Aggregate Bond Index	0.51%	0.96%	1.14%	1.71%	3.60%	4.11%
Bloomberg Barclays U.S. Aggregate 1-3 Year Total Return Bond Index	0.15%	0.59%	0.70%	0.76%	1.68%	2.47%

Returns are annualized net of fees. CMFIX inception date was March 24, 2006.

**Distributions:** The Fund had four quarterly dividend income distributions and one long-term capital gain distribution.

**Table 2**

<b>Record Date</b>	<b>Dividend/ Interest Income</b>	<b>Short-Term Capital Gain</b>	<b>Long-Term Capital Gain</b>	<b>Reinvest NAV</b>
03/30/17	\$0.0849	\$0.00	\$0.00	\$11.49
06/30/17	\$0.0683	\$0.00	\$0.00	\$11.46
09/30/17	\$0.0676	\$0.00	\$0.00	\$11.47
12/29/17	\$0.0690	\$0.00	\$0.1320	\$11.28

CMFIX finished the fiscal year, with the following Morningstar™ ratings in the Short-Term Bond Category.

**Table 3**

Morningstar Rating Overall	479 Funds in the Category	★★★★★
Morningstar Rating 3 Years	479 Funds in the Category	★★★★★
Morningstar Rating 5 Years	438 Funds in the Category	★★★★
Morningstar Rating 10 Years	376 Funds in the Category	★★★★★

*The Morningstar Rating™ for funds, or “star rating,” is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Past performance is no guarantee of future results.*

With the narrowing of credit spreads during the fiscal year, the roughly 55% of Fund assets allocated to corporate bonds was responsible for the majority of the Fund’s positive return. This allocation to corporate bonds is the primary reason that the Fund outperformed the Bloomberg Barclays U.S. Aggregate 1-3 Year Total Return Index, which is primarily invested in short-term U.S. Treasury and U.S. agency securities. This weighting to corporate bonds is also why the Fund underperformed slightly the Fund’s primary benchmark, the Bloomberg Barclays U.S. Aggregate Bond Index, as this index has a higher exposure to corporate bonds.

Table 4 below shows the fiscal year end investment category breakdown of the Fund assets. The corporate bond sector is the one area that saw an increase in its allocation from the previous year from 48.2% of Fund assets at the beginning of the fiscal year to 55.5% at the end of the fiscal year. Table 5 shows how the 55.5% weighting to corporate bonds is allocated to various market sectors.

**Table 4**  
**CMFIX Fiscal Year-End Allocation**

<b>As of February 28, 2018</b>	<b>Percentage Weighting In Fund</b>
U.S. Corporate Bonds	55.5%
Short-Term Treasury Bonds, Bills, and Money Market Funds	15.1%
Intermediate-Term U.S. Treasury Bonds	29.8%

During the fiscal year, we continued to focus our investments on the shorter end of the yield curve, which is reflected in the Fund’s fiscal year end average duration of 2.56 years. In addition, we also believe our relatively even split between shorter duration U.S. corporate bonds and U.S. Treasuries provides the Fund with the opportunity to take advantage of strengthening corporate fundamentals, which in turn should lead to narrower credit spreads. We continue to believe that the combination of narrowing our credit spreads and rolling forward our U.S. Treasuries, as they mature, will offset any pressure from short-term interest rates moving higher. At the same time, we believe the Fund’s portfolio remains highly liquid, enabling us to take advantage of opportunities as they arise.

**Table 6 – CMFIX Portfolio Characteristics**

<b>As of February 28, 2018</b>	
Average Yield to Maturity	3.82%
Average Maturity	2.85 (Yrs.)
Average Coupon	3.89%
Average Duration	2.56 (Yrs.)
Average Moody’s Rating	A3
Average S&P Rating	A-
Number of Issues	56

**The Year in Review**

During the fiscal year, we found several opportunities to increase our corporate bond exposure. Many of these new additions were in the Energy, Industrials, and Materials sectors. While we had good exposure to these sectors going into the fiscal year, we found opportunities to increase our weighting in these sectors throughout the year. While a number of the holdings in these sectors experienced increased volatility during the year relative to previous years, these sectors also provided us with some of our strongest performing securities during the past twelve months.

As credit spreads narrowed, many companies in the Fund's portfolio bought back their shorter-dated bonds to extend their debt maturities. This resulted in a number of the Fund's bond holdings being called or redeemed prior to maturity, which was particularly true from June through December. While these actions created favorable results for the Fund, they also resulted in an increase in the Fund's cash balance.

When considering where on the yield curve we should focus our attention on reinvesting the increasing cash balance, we paid close attention to the U.S. Federal Reserve (the "Fed"), the increasing federal funds rate, and its impact on the yield curve. As the Fed increased interest rates during the year, we first saw two-year yields move more than other longer-dated maturities. Accordingly, we made several investments in corporate bonds with two-to-three year maturities.

For a time, the increasing short-term rates resulted in a flattening of the yield curve. In other words, the short end of the yield curve moved up faster than the long end of the curve. This flattening yield curve created concerns for investors because a flattening or inverted curve generally signals that the economy is headed towards a recession.

However, it was not too long before 10-year yields began to increase and, alas, the yield curve returned to an upward sloping curve and the short-term and long-term interest rates largely moved together. This suggested to us that the general market believed the economy could handle higher interest rates and a recession for the foreseeable future was unlikely. Even when comparing junk bond yields to 10-year U.S. Treasuries as another measure of risk and credit quality, the market is signaling confidence that corporate cash flows will continue to be adequate for lower credit-rated companies. We believe this is largely a result of stronger economic growth exhibited by strong employment figures and increasing gross domestic product (GDP) at home and abroad, which confirmed by our own fundamental analysis. Again, we believe indicators are not signaling a recession in the short-term.

**Final Thoughts**

Many central banks around the world continue to utilize monetary stimulus to induce stronger economic activity and higher inflation. As economic activity strengthened, the Fed has increased the federal funds rate to align U.S. interest rates with the Fed's inflation expectations. We expect the Fed to continue raising rates so long as the economy continues to be strong and can absorb the higher rates. In this environment, we will continue to roll our U.S. Treasuries in the short end of the curve. As we see indications that rate hikes are impeding economic growth, signaling the end of the business cycle, we expect to extend maturities on the Fund's positions and lock in the higher long-term rates in anticipation of lower short-term rates in the future.

With the current narrow credit spread providing fewer investment opportunities in U.S. corporate bonds, we remain very selective in corporate credit and focused on shorter duration bonds. We expect narrow credit spreads to remain until the market becomes concerned about a possible recession and therefore underlying corporate credit risks. At that time, we would expect to see credit spreads widen as the market prices reflect greater perceived credit risk, and more corporate bonds would likely enter our buy zone at lower prices. Overall, with an average A- S&P credit rating, an average duration of 2.67 years, and an average current yield of 3.18%, we feel very comfortable with the current position of the Fund's portfolio.

**CM Advisors Small Cap Value Fund (symbol: CMOVX)**

For the fiscal year ended February 28, 2018, CMOVX generated the following trailing returns:

**Table 1**

As of February 28, 2018	1-Year	2-Years	3-Years	5-Years	Inception
CMOVX	(2.02%)	22.17%	2.65%	2.33%	4.06%
Russell 2000 <sup>®</sup> Value Index	2.96%	20.61%	8.03%	10.59%	9.65%

Returns are annualized net of fees. CMOVX inception date was April 15, 2011.

Table 2 highlights the Fund's average sector weighting during the fiscal year, as well as each sector's contribution to the total return. It also compares these same metrics for the Russell 2000<sup>®</sup> Value Index.

**Table 2 – Attribution Analysis**

<b>Utilities</b>	0.00%	0.00%	6.62%	-0.09%

Source: Bloomberg, LP.

**Energy:** During the fiscal year ended February 28, 2018, the Fund declined 2.02% compared to the Russell 2000® Value Index (the “Benchmark”), which increased by 2.96%; thus, the Fund underperformed the Benchmark by 4.98%. This was largely due to the Fund’s 30.0% average weighting in the Energy sector versus a 5.9% average weighting for the Benchmark. While the Energy sector holdings resulted in a negative return for both the Fund and its Benchmark of -27.31% and -21.53% respectively, it was the Fund’s higher weighting in this sector that made the real difference. The negative contribution to the total return due to the Energy sector holdings for the Fund was -9.77% versus -1.18% for the Benchmark.

To be sure, we continue to believe in our energy thesis and that the fundamentals that are supportive of higher oil prices and higher energy equity prices continue to improve. Crude inventories declined throughout 2017 running counter to consensus expectations. Strong demand continued into the first quarter of 2018, which recorded a counter-seasonal inventory draw, again running counter to consensus expectations. During the fiscal year, in response to the declining inventory levels, West Texas Intermediate Crude Oil (“WTI”) appreciated 14.13% (\$54.01 to \$61.64 per barrel), yet the Energy stocks in the Fund and the Benchmark were down more than 20%. Table 3 below shows that while WTI appreciated 14.13% during the fiscal year, the Energy sector weightings within the S&P 500 Index, the Russell 2000 Index, and the Russell 2000 Value Index were all negative.

**Table 3  
Return Difference Between WTI Crude and Energy Indices  
Over the Past Fiscal Year**

<i>1-Year Ended 2-28-18</i>	2-28-17 Closing Price	2-28-18 Closing Price	<b>Percentage Return</b>
WTI	54.01	61.64	<b>14.13%</b>
vs.			
S&P 500 Energy Sector	519.74	490.67	<b>-5.59%</b>
Russell 2000 Energy Index	295.67	234.01	<b>-20.85%</b>
Russell 2000 Energy Value Index	256.43	203.58	<b>-20.61%</b>

*Source: Bloomberg, LP.*

Table 4 is a repeat of Table 3, except the starting point is from WTI’s low point back on February 11, 2016. From this low, WTI crude oil has appreciated over 135%. This is 2.7 to 10 times more than the energy indices shown on the table.

**Table 4**  
**Return Difference Between WTI Crude and Energy Indices**  
**from WTI Low Point**  
**February 11, 2016 through February 28, 2018**

<i>2.04 Years — Ended 2-28-18</i>	2-11-16 Closing Price	2-28-18 Closing Price	Percentage Return
WTI	26.21	61.64	<b>135.18%</b>
vs.			
S&P 500 Energy Sector	406.22	490.67	<b>20.79%</b>
Russell 2000 Energy Index	166.99	234.01	<b>40.13%</b>
Russell 2000 Energy Value Index	135.62	203.58	<b>50.11%</b>

Source: Bloomberg, LP.

Typically, oil equities trade as a proxy for the commodity. This has begged the question about what catalyzes a change in the momentum trade, and whether it happens sooner rather than later leading to a “normal” crude oil price/energy share price.

We believe that strategies of buy-what-is-working (i.e., technology stocks) and sell-what-is-not (i.e., energy stocks) is a key reason why oil equities are so disconnected from current oil prices. Chart 1 below shows the weighting of the S&P 500 Information Technology sector weight as a percentage of the total S&P 500 Index. As you can see, it is significantly above its long-term average and just 4.00% from its 1999 peak (i.e., what’s been working). Chart 2 shows the weighting of the S&P 500 Energy sector weight as a percentage of the total S&P 500 Index. At 5.51% on February 28, 2018, its roughly 40% below its long-term average (i.e., what hasn’t been working).

**Chart 1**

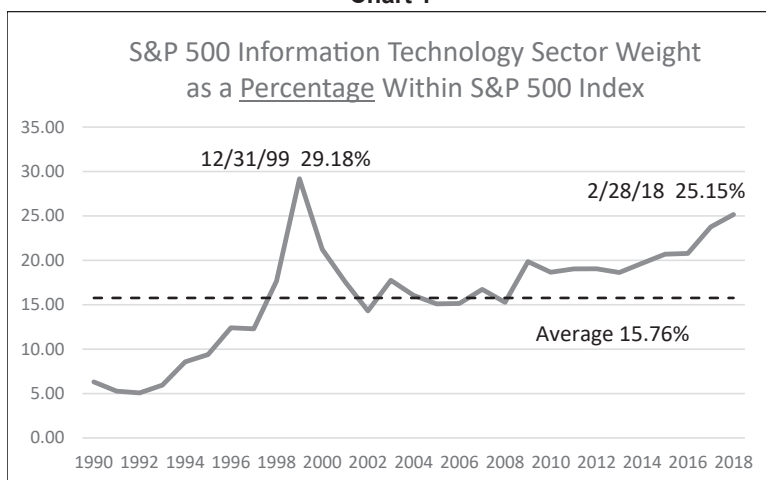

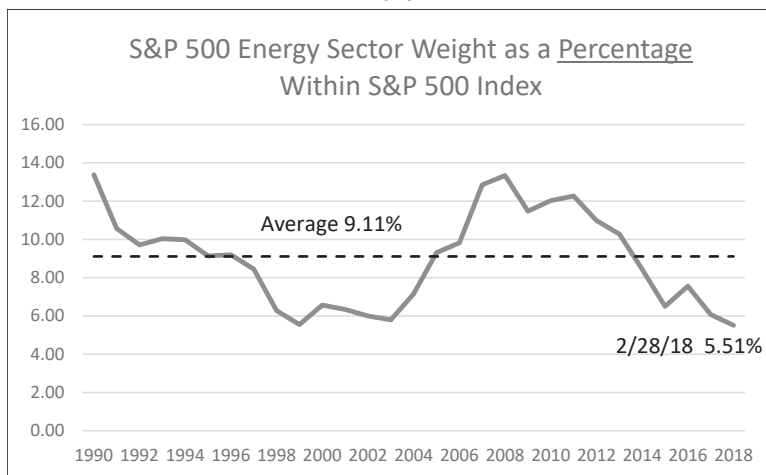

Chart 2

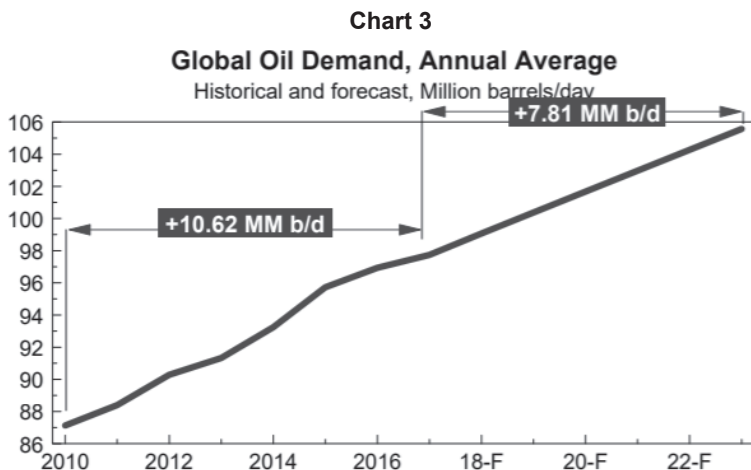

Source: Bloomberg, LP. Based on annual sector weightings.

When the bearish continuity of thought surrounding energy equities is broken, and we believe we are now beginning to see this sentiment thaw, and these two sectors start to revert to their long-term average weights in the various market indices, we expect to see money flow from technology stocks to energy stocks, as hedge funds, institutional investors, mutual funds, ETF's, and indices rebalance their portfolios to reflect better values in the year ahead. This, in our opinion, is one of the catalysts that will begin to increase energy equity prices.

Importantly, in the Fund's Benchmark, the Russell 2000® Value Index, the Energy sector historically has been a much smaller weight relative to the entire Benchmark. For example, according to Bloomberg, over the past 10 years ending December 31, 2017, the Energy sector percentage weight in the Russell 2000® Value Index has averaged 6.3%, the median weight has been 6.4%, and its February 28, 2018 weight was 6.1%. We expect that given the Fund's higher Energy weight relative to the Benchmark has resulted in a disappointment this past year, the reverse should also be true when energy stocks start to reprice higher.

To highlight thoughts that reinforce our belief that energy fundamentals will continue to improve, we need look no further than demand. Chart 3 shows global demand for oil remains strong. During the 2010 through 2017 period, global demand gains exceeded all of non-OPEC's supply gains by about 4.5 million barrels per day. If we extend this period out to 2023 (which is what the March 2018 International Energy Agency "IEA" report centers on), we see this gap expanding further, and the IEA largely agrees.

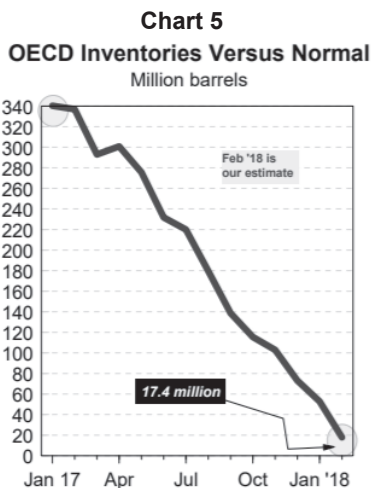

Source: Cornerstone Analytics

Other key takeaways from the March 2018 IEA report<sup>1</sup> that support the demand for oil include:

- A strong world economy is expected to underpin solid increases in oil demand.
- The fastest-growing source of global oil demand growth are petrochemicals, particularly in the United States and China.
- There is no call for complacency, however, and more investment is needed now to ensure secure supplies to meet robust demand growth.
- Natural production declines are slowing, but more investment will be needed. Each year the world needs to replace 3 million barrels/day(mb/d) of supply lost from mature fields while also meeting robust demand growth. That is the equivalent of replacing one North Sea each year.
- Investment in maintaining current production is one challenge; investing in future demand growth is an equal challenge.
- Discoveries of new oil resources fell to another record low in 2017, with less than 4 billion barrels of crude, condensate, and natural gas liquids found.
- In the past three years, oil production from China, Mexico, and Venezuela fell by a combined 1.7 mb/d as a consequence of lower investment.

In addition to the positive contributions attributable to demand, the excess oil inventories brought about during 2014 through 2016 have largely been worked down. Charts 4 and 5 highlight that U.S. Crude inventories and Organization for Economic Co-operation and Development (OECD) inventories have come down considerably and are likely to provide a tighter inventory in 2018.

<sup>1</sup> <https://www.iea.org/media/omrreports/fullissues/2018-03-15.pdf>

Source: Cornerstone Analytics

The bottom line is that while we are frustrated at the near-term results between energy equity prices in the Fund given the move in the price of oil, as value investors it has been our experience over the past 43 years that dislocations like this don't last forever. At the end of the day, we believe the real driving variable to higher intrinsic values and higher prices for many of the energy securities in the Fund reside in the future outcome of oil prices, which we believe are going higher. This is why we continue to maintain a sizeable weighting to the energy sector.

Table 5 shows how the Fund was allocated within the Energy sector at the end of the fiscal year. With 17 different holdings, we believe the Fund has a broadly diversified energy basket. The largest percentage weight is to the drillers industry. While these companies will be more volatile, we also believe they are likely to provide the most upside when the energy equities begin to reprice higher.

**Table 5:**  
**CMOVX Energy Sector Holdings Broken Down by Industry at Fiscal Year End**

As of February 28, 2018	Number of Holdings in Industry	Percentage Weight in CMOVX
Drillers	5	12.67%
Equipment & Services	6	9.14%
Exploration & Production	5	4.46%
Storage & Transportation	1	0.83%

Source: Century Management.

**Industrials:** While Energy was the second highest weighted sector in the Fund during the fiscal year, the Industrials sector was the most heavily weighted sector and it contributed the largest positive sector return in the Fund at 7.16%. This compares to the Benchmark's Industrials sector contribution of 1.52% to its total return. (See Table 2 for the complete fiscal year Fund attribution analysis).

The Industrials sector averaged 42.94% of Fund assets during the fiscal year. This compares to the Benchmark's weight of 12.26%. This 30.68% difference makes the Industrials sector the Fund's most relatively over-weighted sector compared to its Benchmark.

Table 6 breaks down the Fund's Industrials sector holdings into seven different sub-industries with a total of 15 different holdings. The best performing industrials holdings in the Fund during the fiscal year have end-markets that focus on energy, water, and infrastructure. We believe these end-markets and investment themes continue to offer attractive valuations and therefore the Fund continues to own these positions. Moreover, with the recent tax cuts, lower regulations, and an increasing GDP, we believe the Industrials sector, as a whole, offers some of the most attractive valuations and opportunities.

**Table 6:  
CMOVX Industry Holdings Within the Industrials Sector  
During the Fiscal Year**

<b>From 02/28/17 through 02/28/18</b>	<b>Number of Holdings on 2/28/18</b>	<b>Avg. Weight During Fiscal Year</b>	<b>Contribution to Fund Total Return</b>
Industrial Machinery	6	18.57%	3.24%
Construction & Engineering	2	9.89%	2.81%
Construction Machinery & Heavy Trucks	2	5.74%	1.41%
Electrical Components & Equipment	2	4.04%	-0.25%
Aerospace & Defense	1	2.26%	-0.33%
Commercial Printing	1	1.78%	-0.06%
Environmental Components & Equipment	1	0.65%	0.34%

Source: Bloomberg.

**Materials:** The Fund ended the fiscal year with seven holdings in the materials sector. The Fund's average weight in this sector during the fiscal year was 15.74% versus 4.42% for the Benchmark. Collectively, over the fiscal year, the Fund's materials holdings added 2.68% to the total return while the materials holdings in the Benchmark added 0.14%. Table 7 shows how the Fund was allocated within the Materials sector this fiscal year.

**Table 7:  
CMOVX Industry Holdings Within the Materials Sector  
During the Fiscal Year**

From 02/28/17 through 02/28/18	Avg. Weight During Fiscal Year	Contribution to Fund Total Return
Steel & Specialty Metals	12.08%	4.16%
Gold	3.36%	-0.86%
Aluminum	0.30%	-0.63%

*Source: Bloomberg.*

The largest weighting in this sector is steel and specialty metals. This was represented by the Fund's ownership of three companies. We believe these holdings continue to trade below our estimate of fair value (the mid-point between our buy and sell point) and based on our current research, we plan on holding these positions for the foreseeable future.

In an environment where the spot price of gold is \$1,200 to \$1,400 per ounce (*closing price for gold on 2/28/18 per Bloomberg was \$1,317.90*), we believe that the Fund's holdings in this sector are still trading well below our appraisals of their fair values. Moreover, we believe these companies still have the opportunity to have solid upside from their current price levels without any material change in the spot price of gold.

**Financials:** While the Fund averaged 2.54% in the Financials sector this past year, it was by far the largest average weight for the Benchmark at 31.25%. With that said, the Fund's financials holdings had a return of 20.8% versus the Benchmark of 3.49%. When you combine the weights and the corresponding returns, and although the Fund was underweighted in this sector by 28.71% relative to its Benchmark, the Fund edged out the Benchmark with a total return of 0.93% versus 0.92% in the Financials sector. We find it important to inform shareholders that we do not foresee the Fund having anywhere near the Benchmark's weight in the Financials sector, so long as the Benchmark's weight in this sector remains at such elevated levels and valuations for many of the holdings trade above our estimates of fair value.

**Final Thoughts:** Table 8 highlights the valuation ratios for the Fund and its Benchmark. Based on our research, relative to larger stocks, we believe these ratios show that small cap value stocks in general hold better values. Given the weighting to cyclical and commodity based holdings, we believe the value of the overall Fund is best observed using a price-to-book value ratio at the present time. At some point, when these cyclical and commodity-based companies increase their earnings as they go through their earnings cycles, a P/E multiple will also be a good measure. In addition to the price-to-book ratio, we also believe the price-to-sales and enterprise value-to-sales (includes debt and cash) ratios are also good measures of the Fund's fundamental values.

**Table 8**  
**Valuation Ratios as of February 29, 2018**

<b>Ratios</b>	<b>CMOVX</b>	<b>Russell 2000® Value Index</b>
Price to Sales	0.80	0.98
Enterprise Value to Sales	1.26	1.24
Price to Earnings (Trailing)	27.29	18.09
Price to Earnings (FY1)	16.63	14.90
Price to Book Value	0.97	1.43
Price to Cash Flow	9.72	8.07
Dividend Yield	0.64%	1.14%

*Source: Bloomberg, LP. Ratios above are based on the harmonic average. Low ratios suggest cheaper values.*

Towards the end of the fiscal year, volatility picked up and has continued ever since. We believe it is important to remember that the current bull market, since the bottom of 2009, has been the outlier in terms of low volatility. From a historical perspective, the post-Financial Crisis (2007-2008) period has been relatively calm, and for that reason the current market is far from typical in terms of volatility levels. Previous bull markets saw much more frequent market movements than what we've experienced over most of the last nine years, especially in 2016-2017. In fact, 2018's first quarter—as wild as it felt—was actually less volatile for small-cap stocks than their historical average.

**Chart 6**

**Higher Volatility Ahead?**

RVX Averages

*The CBOE Russell 2000 Volatility Index (RVX) measures market expectations of near-term volatility conveyed by Russell 2000 stock index option prices.*

It is our belief that volatility is the friend of an active manager, and that when coupled with investment discipline, provides us the opportunity to take advantage of oversold, as well as overbought, securities. With prospects of strong earnings potential for the remainder of the new fiscal year, helped by lower taxes, lower regulations, growing U.S. and worldwide GDP, and a general optimism among small- and mid-size business owners, we believe the fundamentals remain positive for small cap value stocks.

**Merger:** The CM Advisors Fund completed a tax-free merger into the CMOVX on February 23, 2018. With the combined assets of the two funds, CMOVX net assets were \$92,850,127 as of February 28, 2018.

*Past performance is not predictive of future performance. Investment results and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance data quoted. Performance data current to the most recent month-end are available by calling 1-888-859-5856.*

*An investor should consider the investment objectives, risks, charges and expenses of the Funds carefully before investing. The Funds' prospectus contains this and other important information. To obtain a copy of the Funds' prospectus please visit our website at [www.cmadvisorsfunds.com](http://www.cmadvisorsfunds.com) or call 1-888-859-5856 and a copy will be sent to you free of charge. Please read the prospectus carefully before you invest. The Funds are distributed by Ultimus Fund Distributors, LLC.*

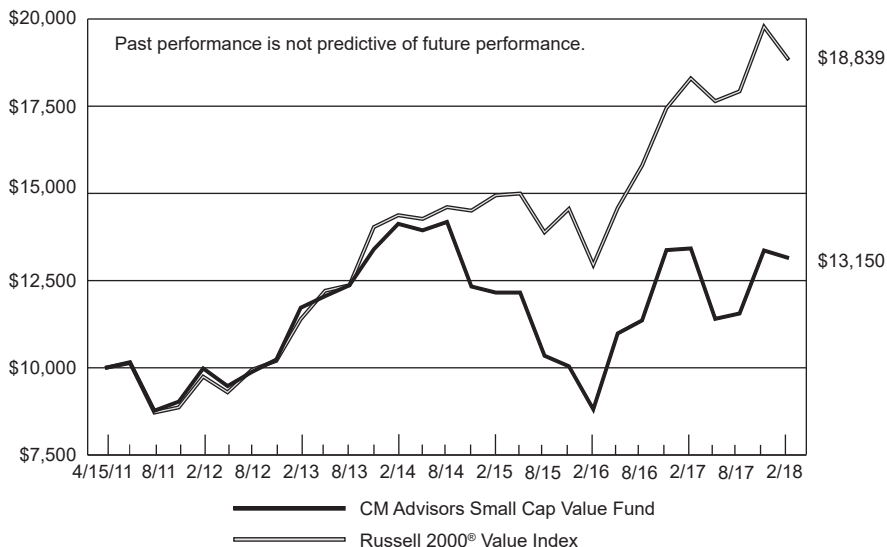

*The Letter to Shareholders seeks to describe some of the investment adviser's current opinions and views of the financial markets. Although the investment adviser believes it has a reasonable basis for any opinions or views expressed, actual results may differ, sometimes significantly so, from those expected or expressed. The securities held by the Funds that are discussed in the Letter to Shareholders were held during the period covered by this Report. They do not comprise the entire investment portfolio of the Funds, may be sold at any time and may no longer be held by the Funds. For a complete list of securities held by the Funds as of February 28, 2018, please see the Schedules of Investments sections of the semi-annual report. The opinions of the Adviser with respect to those securities may change at any time.*

*Statements in the Letter to Shareholders that reflect projections or expectations for future financial or economic performance of the Funds and the market in general and statements of the Funds' plans and objectives for future operations are forward-looking statements. No assurance can be given that actual results or events will not differ materially from those projected, estimated, assumed, or anticipated in any such forward-looking statements. Important factors that could result in such differences, in addition to factors noted with such forward-looking statements, include, without limitation, general economic conditions, such as inflation, recession, and interest rates. Past performance is not a guarantee of future results.*

## Performance Information (Unaudited)

### Comparison of the Change in Value of a \$10,000 Investment in CM Advisors Small Cap Value Fund versus the Russell 2000® Value Index

#### Average Annual Total Returns (for the periods ended February 28, 2018)

	1 Year	5 Years	Since Inception <sup>(a)</sup>
CM Advisors Small Cap Value Fund	(2.02%)	2.33%	4.06%
Russell 2000® Value Index	2.96%	10.59%	9.65%

<sup>(a)</sup> Commencement of operations for CM Advisors Small Cap Value Fund was April 15, 2011.

This graph depicts the performance of CM Advisors Small Cap Value Fund (the "Fund") versus the Russell 2000® Value Index. The graph assumes an initial \$10,000 investment at April 15, 2011 (commencement of operations) and that any dividends or capital gain distributions are reinvested in shares of the Fund. It is important to note that the Fund is a professionally managed mutual fund while indices are not available for investment and are unmanaged. The comparison is shown for illustrative purposes only.

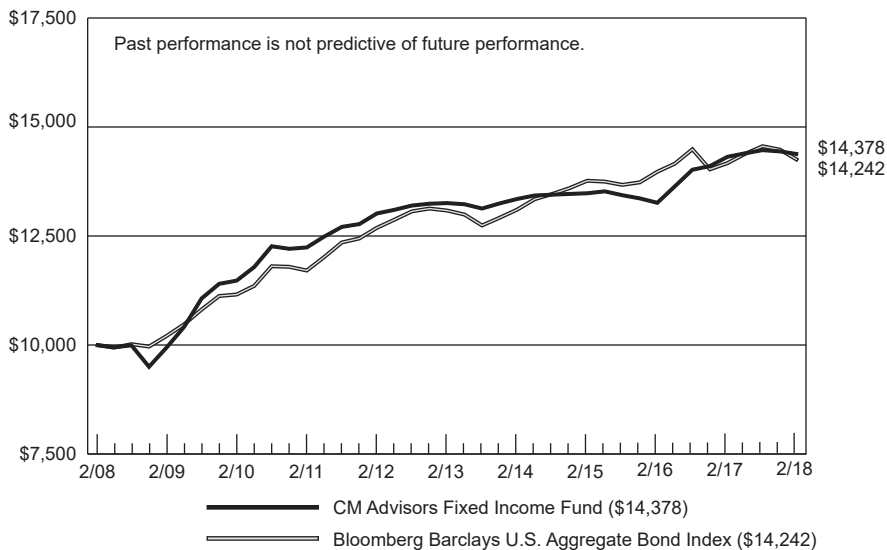

**Performance quoted above represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. An investor may obtain performance data, current to the most recent month-end, by calling shareholder services at 1-888-859-5856.**

The graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Average annual total returns are historical in nature and assume reinvestment of dividends.

### Comparison of the Change in Value of a \$10,000 Investment in CM Advisors Fixed Income Fund versus the Bloomberg Barclays U.S. Bond Aggregate Index

Average Annual Total Returns (for the periods ended February 28, 2018)			
	<u>1 Year</u>	<u>5 Years</u>	<u>10 Years</u>
CM Advisors Fixed Income Fund	0.43%	1.64%	3.70%
Bloomberg Barclays U.S. Aggregate Bond Index	0.51%	1.71%	3.60%

This graph depicts the performance of CM Advisors Fixed Income Fund (the "Fund") versus the Bloomberg Barclays U.S. Aggregate Bond Index. The graph assumes an initial \$10,000 investment at February 28, 2008 and that any dividends or capital gain distributions are reinvested in shares of the Fund. It is important to note that the Fund is a professionally managed mutual fund while indices are not available for investment and are unmanaged. The comparison is shown for illustrative purposes only.

**Performance quoted above represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. An investor may obtain performance data, current to the most recent month-end, by calling shareholder services at 1-888-859-5856.**

The graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Average annual total returns are historical in nature and assume reinvestment of dividends.

# CM Advisors Family of Funds

## Notes to Financial Statements

February 28, 2018

---

### 1. Organization

CM Advisors Small Cap Value Fund and CM Advisors Fixed Income Fund (collectively the “Funds” and individually a “Fund”) are each a separate diversified no-load series of CM Advisors Family of Funds (the “Trust”), which was organized as a Delaware statutory trust and is registered under the Investment Company Act of 1940 as an open-end management investment company.

CM Advisors Small Cap Value Fund commenced operations on April 15, 2011. The investment objective of the Fund is long-term growth of capital.

CM Advisors Fixed Income Fund commenced operations on March 24, 2006. The investment objective of the Fund is to preserve capital and maximize total return.

On February 23, 2018, CM Advisors Small Cap Value Fund consummated a tax-free merger with CM Advisors Fund, previously a series of the Trust. Pursuant to the terms of the agreement governing the merger, each share of CM Advisors Fund was converted into an equivalent dollar amount of shares of CM Advisors Small Cap Value Fund, based on the net asset value (“NAV”) of CM Advisors Small Cap Value Fund and CM Advisors Fund as of February 23, 2018 (\$11.52 and \$12.33, respectively); this resulted in a conversion ratio of 1.069924 shares of CM Advisors Small Cap Value Fund for each share of CM Advisors Fund. CM Advisors Small Cap Value Fund issued 4,297,048 shares to shareholders of CM Advisors Fund in connection with the merger. The basis of the assets transferred from CM Advisors Fund reflected the historical basis of the assets as of the date of the tax-free merger. Net assets of CM Advisors Small Cap Value Fund and CM Advisors Fund as of the merger date were \$46,843,398 and \$49,517,475, respectively, including unrealized appreciation (depreciation) on investments of \$7,705,053 and \$(8,998,243), respectively. Total net assets of CM Advisors Small Cap Value Fund immediately after the merger were \$96,360,873.

Assuming the acquisition had been completed on March 1, 2017 (the beginning of the annual reporting period of CM Advisors Small Cap Value Fund), CM Advisors Small Cap Value Fund’s pro forma results of operations for the year ended February 28, 2018 were as follows:

---

<b>Net Investment Loss</b>	<b>Net Realized Losses and Net Change in Unrealized Depreciation on Investments</b>	<b>Net Decrease in Net Assets Resulting from Operations</b>
\$(969,522)	\$(5,029,722)	\$(5,999,244)

---

Because the combined investment portfolios have been managed as a single integrated portfolio since the merger was completed, it is not practical to separate the amounts of revenue and earnings of CM Advisors Fund that have been included in CM Advisors Small Cap Value Fund’s Statement of Operations since February 23, 2018.

### 2. Significant Accounting Policies

In October 2016, the U.S. Securities and Exchange Commission (the “SEC”) adopted amendments to Regulation S-X which impact financial statement presentation, particularly the presentation of derivative investments. The Funds have adopted these amendments, which were effective August 1, 2017, with these financial statements.

The following is a summary of the Funds’ significant accounting policies used in the preparation of their financial statements. These policies are in conformity with accounting principles generally accepted in the United States of America (“GAAP”). The Funds follow accounting and reporting guidance under Financial Accounting Standards Board (“FASB”) Accounting Standards Codification Topic 946, “Financial Services – Investment Companies.”

**Investment Valuation** – The Funds’ portfolio securities are generally valued at their market values determined on the basis of available market quotations as of the close of regular trading on the New York Stock Exchange (typically 4:00 p.m. Eastern time). Securities listed on an exchange or quoted on a national market system are valued at the last sales price. Securities which are quoted by NASDAQ are valued at the NASDAQ Official Closing Price. Securities traded in the over-the-counter market and listed securities for which no sale was reported on that date are valued at the most recent bid price. Fixed income securities are typically valued based on prices provided by an independent pricing service. Securities and assets for which representative market quotations are not readily available (e.g., if the exchange on which the portfolio security is principally traded closes early or if trading of the particular portfolio security is halted during the day and does not resume prior to the Funds’ NAV calculations) or which cannot be accurately valued using the Funds’ normal pricing procedures are valued at fair value as determined in good faith under policies approved by the Board of Trustees (the “Board”) and will be classified as Level 2 or 3 within the fair value hierarchy (see below), depending on the inputs used. A portfolio security’s “fair value” price may differ from the price next available for that portfolio security using the Funds’ normal pricing procedures.

GAAP establishes a single authoritative definition of fair value, sets out a framework for measuring fair value and requires disclosures about fair value measurements.

Various inputs are used in determining the value of the Funds’ investments. These inputs are summarized in the three broad levels listed below:

- Level 1 – quoted prices in active markets for identical securities
- Level 2 – other significant observable inputs
- Level 3 – significant unobservable inputs

Corporate bonds and U.S. Treasury obligations held by CM Advisors Fixed Income Fund are classified as Level 2 since values are based on prices provided by an independent pricing service that utilizes various “other significant observable inputs” including bid and ask quotations, prices of similar securities and interest rates, among other factors.

The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities. The inputs used to measure the fair value of a particular security may fall into different levels of the fair value hierarchy.

# CM Advisors Family of Funds

## Notes to Financial Statements (Continued)

In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement of that security falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement.

The following is a summary of the inputs used to value the Funds' investments as of February 28, 2018 by security type:

### CM Advisors Small Cap Value Fund

	Level 1	Level 2	Level 3	Total
Common Stocks .....	\$ 63,635,708	\$ —	\$ —	\$ 63,635,708
Exchange-Traded Funds .....	1,698,292	—	—	1,698,292
Warrants .....	—	0*	—	0
Money Market Funds .....	25,554,097	—	—	25,554,097
Total .....	<u>\$ 90,888,097</u>	<u>\$ 0</u>	<u>\$ —</u>	<u>\$ 90,888,097</u>

### CM Advisors Fixed Income Fund

	Level 1	Level 2	Level 3	Total
Corporate Bonds .....	\$ —	\$ 37,144,111	\$ —	\$ 37,144,111
U.S. Treasury Obligations .....	—	19,958,151	—	19,958,151
Money Market Funds .....	10,115,479	—	—	10,115,479
Total .....	<u>\$ 10,115,479</u>	<u>\$ 57,102,262</u>	<u>\$ —</u>	<u>\$ 67,217,741</u>

\* CM Advisors Small Cap Value Fund holds Warrants that have been fair valued at \$0.

Refer to each Fund's Schedule of Investments for a listing of the securities by security type and sector or industry type. As of February 28, 2018, the Funds did not have any transfers into or out of any Level. The Funds did not hold any derivative instruments or assets or liabilities that were measured at fair value on a recurring basis using significant unobservable inputs (Level 3) as of February 28, 2018. It is the Funds' policy to recognize transfers into or out of any Level at the end of the reporting period.

**Share Valuation and Redemption Fees** – The NAV per share of each Fund is calculated on each business day by dividing the total value of the Fund's assets, less liabilities, by the number of shares outstanding. The offering price and redemption price per share of each Fund is equal to the NAV per share, except that shares of CM Advisors Small Cap Value Fund are subject to a redemption fee of 1%, payable to the Fund, if redeemed within 180 days of the date of purchase. No redemption fee, however, will be imposed on the exchange of shares of CM Advisors Small Cap Value Fund for shares of CM Advisors Fixed Income Fund. Shares of CM Advisors Fixed Income Fund are not subject to a redemption fee.

During the years ended February 28, 2018 and 2017, proceeds from redemption fees for CM Advisors Small Cap Value Fund were \$3,420 and \$8,045, respectively.

**Investment Transactions and Investment Income** – Investment transactions are accounted for on trade date. Dividend income is recorded on the ex-dividend date. Interest income is accrued as earned. Discounts and premiums on fixed income

# CM Advisors Family of Funds

## Notes to Financial Statements (Continued)

securities purchased are amortized using the effective interest method. Realized gains and losses on investments sold are determined on a specific identification basis, which is the same basis used for federal income tax purposes. Withholding taxes on foreign dividends have been provided for in accordance with the Funds' understanding of the applicable country's tax rules and rates.

**Expenses** – Each Fund bears expenses incurred specifically on its behalf as well as a portion of general Trust expenses, which are allocated between the Funds according to methods authorized by the Board.

**Dividends and Distributions** – Dividends arising from net investment income, if any, are declared and paid quarterly to shareholders of each Fund. Distributions from net realized capital gains, if any, are generally declared and distributed annually. The amount of distributions from net investment income and net realized capital gains are determined in accordance with federal income tax regulations, which may differ from GAAP. These “book/tax” differences are either temporary or permanent in nature and are primarily due to differing treatments of net short-term capital gains. Dividends and distributions are recorded on the ex-dividend date.

The tax character of distributions paid during the years ended February 28, 2018 and 2017 was as follows:

Years Ended	Ordinary Income	Long-Term Capital Gains	Total Distributions
<b>CM Advisors Small Cap Value Fund</b>			
February 28, 2018 .....	\$ —	\$ —	\$ —
February 28, 2017 .....	\$ 513,274	\$ —	\$ 513,274
<b>CM Advisors Fixed Income Fund</b>			
February 28, 2018 .....	\$ 1,719,942	\$ 792,220	\$ 2,512,162
February 28, 2017 .....	\$ 2,160,060	\$ 105,057	\$ 2,265,117

On March 29, 2018, CM Advisors Fixed Income Fund paid an ordinary income dividend of \$0.0656 per share to shareholders of record on March 28, 2018.

**Estimates** – The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

**New Accounting Pronouncement** – In March, 2017, FASB issued Accounting Standards Update No. 2017-08 - Receivables – Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities (the “ASU”). The amendments in the ASU shorten the amortization period for certain callable debt securities, held at a premium, to be amortized to the earliest call date. The ASU does not require an accounting change for securities held at a discount, which continues to be amortized to maturity. The ASU is effective for fiscal years and interim periods within those fiscal years beginning after December 15, 2018. Management is currently evaluating the impact, if any, of applying this update.

**CM Advisors Family of Funds**  
**Notes to Financial Statements (Continued)**

**3. Federal Income Tax**

Each Fund has qualified and intends to continue to qualify each year as a “regulated investment company” under Subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”). Qualification generally will relieve the Funds of liability for federal income taxes to the extent 100% of their net investment income and net realized capital gains are distributed in accordance with the Code.

In order to avoid imposition of the excise tax applicable to regulated investment companies, it is also each Fund’s intention to declare as dividends in each calendar year at least 98% of its net investment income (earned during the calendar year) and 98.2% of its net realized capital gains (earned during the twelve months ended October 31) plus undistributed amounts from prior years.

The following information is computed on a tax basis for each item as of February 28, 2018:

	CM Advisors Small Cap Value Fund	CM Advisors Fixed Income Fund
Tax cost of portfolio investments .....	\$ 94,721,641	\$ 66,679,079
Gross unrealized appreciation .....	\$ 11,119,773	\$ 789,799
Gross unrealized depreciation .....	(14,953,317)	(251,137)
Net unrealized appreciation (depreciation) .....	(3,833,544)	538,662
Undistributed ordinary income .....	—	261,318
Undistributed long-term gains .....	—	192,155
Accumulated capital and other losses .....	(4,179,835)	—
Accumulated earnings (deficit) .....	\$ (8,013,379)	\$ 992,135

The difference between the federal income tax cost of portfolio investments and the financial statement cost for CM Advisors Small Cap Value Fund is due to certain timing differences in the recognition of capital gains or losses under income tax regulations and GAAP. These “book/tax” differences are temporary in nature and are due to the tax deferral of losses on wash sales and holdings classified as passive foreign investment companies (PFICs).

For the year ended February 28, 2018, CM Advisors Small Cap Value Fund made the following reclassifications on the Statements of Assets and Liabilities:

Paid-in Capital .....	\$ (430,094)
Accumulated net investment loss .....	490,629
Accumulated net realized losses from investment transactions .....	(60,535)

Such reclassifications, the result of permanent differences between the financial statement and income tax requirements, have no effect on the Fund’s net assets or NAV per share and are due to the tax treatment of net investment losses.

# CM Advisors Family of Funds

## Notes to Financial Statements (Continued)

As of February 28, 2018, CM Advisors Small Cap Value Fund had short-term capital loss carryforwards of \$1,683,667 and long-term capital loss carryforwards of \$2,112,537 for federal income tax purposes. These capital loss carryforwards, which do not expire but their utilization is limited due to merger related capital loss carryover limitations, may be utilized in future years to offset net realized capital gains, if any, prior to distributing such gains to shareholders.

Net qualified late-year ordinary losses represent losses incurred after December 31, 2017 but within the Fund's taxable year ended February 28, 2018. These losses are deemed to arise on the first day of the Fund's next taxable year. For the year ended February 28, 2018, the Fund intends to defer \$383,631 of late-year ordinary losses to March 1, 2018 for income tax purposes.

The Funds recognize the benefits or expenses of uncertain tax positions only if the position is "more-likely-than-not" of being sustained assuming examination by tax authorities. Management has reviewed the tax positions taken on federal income tax returns for all open tax years (tax years ended February 28, 2015 through February 28, 2018) and has concluded that no provision for unrecognized tax benefits or expenses is required in these financial statements.

### 4. Investment Transactions

During the year ended February 28, 2018, cost of purchases and proceeds from sales and maturities of investment securities, other than short-term investments and U.S. Government obligations, were as follows:

	CM Advisors Small Cap Value Fund	CM Advisors Fixed Income Fund
Cost of purchases of investment securities .....	<u>\$ 11,444,503</u>	<u>\$ 21,275,464</u>
Proceeds from sales and maturities of investment securities ...	<u>\$ 11,611,768</u>	<u>\$ 15,138,631</u>

### 5. Transactions with Related Parties

#### INVESTMENT ADVISORY AGREEMENT

The Funds pay a monthly advisory fee to Van Den Berg Management I, Inc. (d/b/a CM Fund Advisors) (the "Advisor") based upon the average daily net assets of each Fund and calculated at the annual rate of 1.00% for CM Advisors Small Cap Value Fund and 0.50% for CM Advisors Fixed Income Fund. The Advisor has entered into agreements (the "Expense Limitation Agreements") with each Fund under which it has agreed to waive its fees and to assume other expenses of the Funds, if necessary, in an amount that limits the Funds' total operating expenses (exclusive of interest, taxes, brokerage commissions, other expenditures which are capitalized in accordance with GAAP, extraordinary expenses not incurred in the ordinary course of the Fund's business, dividend expense on securities sold short, acquired fund fees and expenses, and amounts, if any, payable pursuant to a Rule 12b-1 plan) to not more than 1.25% of the average daily net assets of CM Advisors Small Cap Value Fund and not more than 1.50% of the average daily net assets of CM Advisors Fixed Income Fund, each until July 1, 2019. There can be no assurance that the Expense Limitation Agreements will continue

# **CM Advisors Family of Funds**

## **Notes to Financial Statements (Continued)**

---

beyond July 1, 2019. During the year ended February 28, 2018, with respect to CM Advisors Small Cap Value Fund, the Advisor waived \$99,662 of its investment advisory fees. During the year ended February 28, 2018, there were no advisory fees waived or expenses reimbursed by the Advisor with respect to CM Advisors Fixed Income Fund.

Certain Trustees and officers of the Trust are also officers of the Advisor.

### **OTHER SERVICE PROVIDERS**

Ultimus Fund Solutions, LLC (“Ultimus”) provides administration, accounting, and transfer agency services to the Funds. The Funds pay Ultimus fees in accordance with the agreements for its services. In addition, the Funds pay out-of-pocket expenses including, but not limited to, postage, supplies and costs of pricing the Funds’ portfolio securities. Certain officers of the Trust are also officers of Ultimus, or of Ultimus Fund Distributors, LLC (the “Distributor”).

Pursuant to the terms of a Distribution Agreement with the Trust, the Distributor serves as the Funds’ principal underwriter. The Distributor is a wholly-owned subsidiary of Ultimus. The Distributor receives compensation from the Funds for such services.

### **COMPENSATION OF TRUSTEES**

Trustees and officers affiliated with the Advisor or Ultimus are not compensated by the Funds for their services. Each Trustee who is not an affiliated person of the Advisor or Ultimus receives an annual retainer of \$10,000, paid quarterly; a fee of \$2,000 per Fund for attendance at each in-person meeting of the Board of Trustees; and a fee of \$500 per Fund for attendance at each telephonic meeting of the Board of Trustees. The Funds reimburse each Trustee and officer for his or her travel and other expenses relating to attendance at Board or committee meetings.

## **6. Sector Risk**

If a Fund has significant investments in the securities of issuers in industries within a particular sector, any development affecting that sector will have a greater impact on the value of the net assets of the Fund than would be the case if the Fund did not have significant investments in that sector. In addition, this may increase the risk of loss of an investment in the Fund and increase the volatility of the Fund’s NAV per share. From time to time, a particular set of circumstances may affect this sector or certain companies within the sector, while having little or no impact on other sectors or other companies within the sector. For instance, economic or market factors, regulation or deregulation, and technological or other developments may negatively impact all companies in a particular sector and therefore the value of a Fund’s portfolio will be adversely affected. As of February 28, 2018, CM Advisors Small Cap Value Fund had 27.0% and 30.4% of the value of its net assets invested in stocks and exchange-traded funds within the Energy and Industrials sectors, respectively.

# **CM Advisors Family of Funds**

## **Notes to Financial Statements (Continued)**

---

### **7. Investments in Money Market Mutual Funds**

In order to maintain sufficient liquidity to implement investment strategies, or for temporary defensive purposes, each Fund may at times invest a significant portion of its assets in shares of one or more money market mutual funds. An investment in a money market mutual fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, entity or person. While investor losses in money market mutual funds have been rare, they are possible. The Funds incur additional indirect expenses due to acquired fund fees and expenses to the extent they invest in shares of money market mutual funds. As of February 28, 2018, CM Advisors Small Cap Fund had 27.6% of the value of its net assets invested in shares of a money market mutual fund.

### **8. Contingencies and Commitments**

The Funds indemnify the Trust's officers and Trustees for certain liabilities that might arise from the performance of their duties to the Funds. Additionally, in the normal course of business, the Funds enter into contracts that contain a variety of representations and warranties and which provide general indemnifications. Each Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, based on experience, the Trust expects the risk of loss to be remote.

### **9. Subsequent Events**

The Funds are required to recognize in the financial statements the effects of all subsequent events that provide additional evidence about conditions that existed as of the date of the Statements of Assets and Liabilities. For non-recognized subsequent events that must be disclosed to keep the financial statements from being misleading, the Funds are required to disclose the nature of the event as well as an estimate of the financial effect, or a statement that such an estimate cannot be made. Management has evaluated subsequent events through the issuance of these financial statements and has noted no such events.

## **Report of Independent Registered Public Accounting Firm**

---

**To the Board of Trustees of CM Advisors Family of Funds  
and the Shareholders of CM Advisors Small Cap Value Fund  
and CM Advisors Fixed Income Fund**

### **Opinion on the Financial Statements**

We have audited the accompanying statements of assets and liabilities of CM Advisors Small Cap Value Fund and CM Advisors Fixed Income Fund, each a series of shares of beneficial interest in CM Advisors Family of Funds (the “**Funds**”), including the schedules of investments, as of February 28, 2018, and the related statements of operations for the year then ended, the statements of changes in net assets for each of the years in the two-year period then ended and the financial highlights for each of the years in the five-year period then ended, and the related notes (collectively referred to as the “**financial statements**”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Funds as of February 28, 2018, and the results of their operations for the year then ended, the changes in their net assets for each of the years in the two-year period then ended and their financial highlights for each of the years in the five-year period then ended, in conformity with accounting principles generally accepted in the United States of America.

### **Basis for Opinion**

These financial statements are the responsibility of the Funds’ management. Our responsibility is to express an opinion on the Funds’ financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“**PCAOB**”) and are required to be independent with respect to the Funds in accordance with the U.S. federal securities law and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement, whether due to error or fraud. The Funds are not required to have, nor were we engaged to perform, an audit of their internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Funds’ internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risk of material misstatement of those financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of February 28, 2018 by correspondence with the custodian and brokers. Our audits also included evaluating the accounting

## **CM Advisors Family of Funds**

### **About Your Funds' Expenses (Unaudited)**

---

We believe it is important for you to understand the impact of costs on your investment. As a shareholder of the Funds, you may incur two types of costs: (1) transaction costs, including redemption fees; and (2) ongoing costs, including management fees and other Fund expenses. Ongoing costs, which are deducted from each Fund's gross income, directly reduce the investment return of the Funds.

A mutual fund's ongoing costs are expressed as a percentage of its average net assets. This figure is known as the expense ratio. The following examples are intended to help you understand the ongoing costs (in dollars) of investing in the Funds and to compare these costs with the ongoing costs of investing in other mutual funds. The examples below are based on an investment of \$1,000 made at the beginning of the most recent semi-annual period (September 1, 2017) and held until the end of the period (February 28, 2018).

The table below illustrates each Fund's costs in two ways:

**Actual fund return** – This section helps you to estimate the actual expenses that you paid over the period. The "Ending Account Value" shown is derived from each Fund's actual return, and the fourth column shows the dollar amount of expenses that would have been paid by an investor who started with \$1,000 in the Funds. You may use the information here, together with the amount you invested, to estimate the ongoing costs that you paid over the period.

To do so, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number given for the Funds under the heading "Expenses Paid During Period."

**Hypothetical 5% return** – This section is intended to help you compare each Fund's ongoing costs with those of other mutual funds. It assumes that each Fund had an annual return of 5% before expenses during the period shown, but that the expense ratio is unchanged. In this case, because the return used is not the Funds' actual returns, the results do not apply to your investment. The example is useful in making comparisons because the SEC requires all mutual funds to calculate expenses based on a 5% return. You can assess each Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

Note that expenses shown in the table are meant to highlight and help you compare ongoing costs only. The Funds do not impose any sales loads. However, a redemption fee of 1% is charged on the sale of shares of CM Advisors Small Cap Value Fund within 180 days of the date of their purchase.

The calculations assume no shares were bought or sold during the period. Your actual costs may have been higher or lower, depending on the amount of your investment and the timing of any purchases or redemptions.

## CM Advisors Family of Funds

### About Your Funds' Expenses (Unaudited) (Continued)

More information about the Funds' expenses, including annual expense ratios, can be found in this report. For additional information on operating expenses and other shareholder costs, please refer to the Funds' prospectus.

	Beginning Account Value September 1, 2017	Ending Account Value February 28, 2018	Net Expense Ratio <sup>(a)</sup>	Expenses Paid During Period <sup>(b)</sup>
<b>CM Advisors Small Cap Value Fund</b>				
Based on Actual Fund Return .....	\$ 1,000.00	\$ 1,137.90	1.25%	\$ 6.63
Based on Hypothetical 5% Return (before expenses) .....	\$ 1,000.00	\$ 1,018.60	1.25%	\$ 6.26
<b>CM Advisors Fixed Income Fund</b>				
Based on Actual Fund Return .....	\$ 1,000.00	\$ 993.70	0.88%	\$ 4.35
Based on Hypothetical 5% Return (before expenses) .....	\$ 1,000.00	\$ 1,020.43	0.88%	\$ 4.41

<sup>(a)</sup> Annualized, based on the Fund's most recent one-half year expenses.

<sup>(b)</sup> Expenses are equal to the Funds' annualized net expense ratio multiplied by the average account value over the period, multiplied by 181/365 (to reflect the one-half year period).

### **Other Information (Unaudited)**

---

The Trust files a complete listing of portfolio holdings for the Funds with the SEC as of the end of the first and third quarters of each fiscal year on Form N-Q. The filings are available upon request, by calling 1-888-859-5856. Furthermore, you may obtain a copy of these filings on the SEC's website at <http://www.sec.gov>. The Trust's Forms N-Q may also be reviewed and copied at the SEC's Public Reference Room in Washington, DC, and information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to portfolio securities is available without charge upon request by calling toll-free 1-888-859-5856, or on the SEC's website at <http://www.sec.gov>. Information regarding how the Funds voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is also available without charge upon request by calling toll-free 1-888-859-5856, or on the SEC's website at <http://www.sec.gov>.

### **Federal Tax Information (Unaudited)**

---

In accordance with federal tax requirements, the following provides shareholders with information concerning distributions made by the Funds during the year ended February 28, 2018. Certain dividends paid by the Funds may be subject to a maximum rate of 23.8%. CM Advisors Fixed Income Fund intends to designate up to a maximum amount of its long-term capital gain distributions of \$792,220 and ordinary income dividends of \$1,719,942 as taxed at the maximum rate of 23.8%. As required by federal regulations, complete information was computed and reported in conjunction with your 2017 Form 1099-DIV.

## Information about Trustees and Executive Officers (Unaudited)

The business and affairs of the Trust are managed under the direction of the Trustees. Information concerning the Trustees and officers of the Trust is set forth on the following pages. Generally, each Trustee serves an indefinite term or until his resignation, death, or otherwise as specified in the Trust's organizational documents. Any Trustee may be removed at a meeting of shareholders by a vote meeting the requirements of the Trust's organizational documents. The officers are elected for annual terms. The Statement of Additional Information of the Funds includes additional information about the Trustees and officers and is available, without charge, upon request by calling the Funds' toll-free at 1-888-859-5856.

# **CM Advisors Family of Funds**

## **Approval of Investment Advisory Agreement (Unaudited)**

---

The Board, including the Independent Trustees voting separately, has reviewed and approved the continuance of the Investment Advisory Agreements with the Advisor for CM Advisors Fixed Income Fund (the "Fixed Income Fund") and CM Advisors Small Cap Value Fund (the "Small Cap Value Fund") for an additional annual term. Approval took place at an in-person meeting held on February 16, 2018, at which a majority of the Trustees, including a majority of the Independent Trustees, were present.

During their deliberations, the Board was advised by legal counsel and reviewed a substantial amount of information provided by the Advisor in response to requests of the Board and counsel.

In considering the Investment Advisory Agreements for the Fixed Income Fund and the Small Cap Value Fund and reaching their conclusions with respect thereto, the Board reviewed and analyzed various factors that it determined were relevant, including the factors described below.

The nature, extent, and quality of the services provided by the Advisor. In this regard, the Board reviewed the services being provided by the Advisor to the Fixed Income Fund and the Small Cap Value Fund including, without limitation, its investment advisory services since each Fund's inception, its coordination of services for the Funds among the Funds' service providers, its compliance procedures and practices, and its efforts to promote the Funds and assist in their distribution. The Board also noted that the Trust's president, secretary, treasurer, CCO, principal executive officer, and principal financial officer are employees of the Advisor and they each serve the Trust without additional compensation from any of the Funds. After reviewing the foregoing information and other information (e.g., descriptions of the Advisor's business and the Advisor's Form ADV), the Board concluded that the quality, extent, and nature of the services provided by the Advisor are satisfactory and adequate for the Fixed Income Fund and the Small Cap Value Fund.

The investment performance of the Fixed Income Fund, the Small Cap Value Fund, and the Advisor. In this regard, the Board compared the performance of each of the Fixed Income Fund and the Small Cap Value Fund with the performance of its respective benchmark index, comparable funds managed by other advisors, and comparable peer group indices. The Board noted that, although the performance of the Small Cap Value Fund had significantly lagged the performance of its benchmark and its respective Morningstar categories for the one-year, three-year, five-year, ten-year, and since inception periods, the performance of the Fund had improved over the shorter term. The Board further noted that the Advisor had reasonably explained the factors contributing to the long-term underperformance, including the impact of the Fund's sector allocations, and had also satisfactorily described the Advisor's expectations, monitoring of, and prospective measures with respect to future performance. As for the Fixed Income Fund, the Board noted that the performance of the Fund outperformed its benchmark for the three-year and since inception periods, but also that it had underperformed for the one, five, and ten-year periods. The Board also noted that the Fixed Income Fund outperformed the comparable Morningstar category over the one, three, five and ten-year periods. The Board also considered the consistency of the Advisor's management of the Fixed Income Fund and the Small Cap Value Fund with each Fund's investment objective and policies. Furthermore, the Board noted that, while the Small Cap Value Fund had underperformed its benchmark over the long-term, the Advisor had reasonably demonstrated that it followed reasoned, logical processes in selecting investments for the Fund and presented a solid analysis to back up the positions that had been taken and

## **CM Advisors Family of Funds**

### **Approval of Investment Advisory Agreement (Unaudited) (Continued)**

---

the Advisor's belief that such positions continued to have strong upside potential in the longer term. Following discussion of the short- and long-term investment performance of the Fixed Income Fund and the Small Cap Value Fund; each Fund's Morningstar ratings; the Advisor's experience in managing each Fund and separate accounts; the Advisor's good historical investment performance; and other factors, the Board concluded that the investment performance of the Fixed Income Fund and the Small Cap Value Fund and the Advisor was acceptable.

The costs of the services provided and profits realized by the Advisor from its relationship with the Advisors Fund, the Fixed Income Fund and the Small Cap Value Fund. In this regard, the Board considered the Advisor's staffing, personnel, and methods of operating; the Advisor's compliance policies and procedures; the financial condition of the Advisor and its level of commitment to the Funds; the level of commitment to the Funds by the principals of the Advisor; the asset levels of the Funds; the Advisor's previous payment of startup costs for each Fund; the overall expenses of the Funds; the Advisor's estimated costs in managing the Funds and the corresponding profitability to the Advisor of managing each Fund; and the differences in fees and services provided to the Advisor's other clients that may be similar to the Funds. The Board discussed the Expense Limitation Agreements of the Advisors Fund, the Fixed Income Fund, and the Small Cap Value Fund with the Advisor and considered the Advisor's current and past fee waivers and expense reimbursements for the Funds under the Expense Limitation Agreements. The Board further considered that the Advisor has represented that it intends to continue the Expense Limitation Agreements for the Advisors Fund, the Fixed Income Fund and the Small Cap Value Fund until at least July 1, 2019.

The Board also considered potential benefits to the Advisor in managing the Advisors Fund, the Fixed Income Fund, and the Small Cap Value Fund, including promotion of the Advisor's name, the ability of the Advisor to place small accounts into each Fund, and the potential for the Advisor to generate soft dollars from Fund trades that may benefit the Advisor's clients other than the Funds.

The Board compared the fees and expenses of the Advisors Fund, the Fixed Income Fund and the Small Cap Value Fund (including each Fund's management fee) to a peer group of other funds comparable to each Fund in terms of the type of fund, the style of investment management, the size of the fund, and the nature of the investment strategy and markets invested in, among other factors. The Board noted that the management fee and net expense ratio of the Advisors Fund are each higher than, but within a reasonable range of, the median and average of the true no-load funds within its peer group, bearing in mind that the Fund was smaller in size than its peer group average and median. The Board noted that the Small Cap Value Fund's management fee is equal to the average, but its net expense ratio is higher than, but within a reasonable range of, the median of the true no-load funds within its peer group, bearing in mind that the Fund was smaller in size than its peer group average and median. The Board noted that the Fixed Income Fund's management fee is equal to the average, but its net expense ratio is higher than, but within a reasonable range of, the median of the true no-load funds within its peer group, bearing in mind that the Fund was smaller in size than its peer group average and median. The Board also compared the fees paid by each Fund to the fees paid by other clients of the Advisor and, bearing in mind the limitations of comparing different types of managed accounts and the different levels of service typically associated with such accounts, noted that the fee structures applicable to the Advisor's other clients

## **CM Advisors Family of Funds**

### **Approval of Investment Advisory Agreement (Unaudited) (Continued)**

---

utilizing similar strategies were not indicative of any unreasonableness regarding the advisory fees proposed to be payable by each Fund. Following these comparisons and upon further consideration and discussion of the foregoing, the Board concluded that the profit realized by the Advisor in connection with the management of each Fund is not unreasonable and that the management fees paid to the Advisor by the Advisors Fund, the Fixed Income Fund, and the Small Cap Value Fund are each fair and reasonable.

The extent to which economies of scale would be realized as the Fixed Income Fund and the Small Cap Value Fund grow and whether management fee levels reflect these economies of scale for the benefit of each Fund's investors. In this regard, the Board considered that the fee arrangements of the Fixed Income Fund, and the Small Cap Value Fund with the Advisor each involve both a management fee and an Expense Limitation Agreement. In connection with the Fixed Income Fund, the Board determined that, although the Fund's assets have grown to a level where the Advisor is receiving its full fee, the Fixed Income Fund has experienced benefits from the Expense Limitation Agreement in prior years. The Board noted that, while the management fee would remain the same at all asset levels, the Fixed Income Fund will likely benefit from economies of scale under its agreements with service providers other than the Advisor. In connection with the Small Cap Value Fund, the Board determined that, while the management fee remained the same at all asset levels, the Fund has experienced benefits from the Expense Limitation Agreement. In addition, the Board noted that the Small Cap Value Fund will likely benefit from economies of scale under its agreements with service providers other than the Advisor. Following further discussion of the asset levels of the Fixed Income Fund and the Small Cap Value Fund and expectations for growth and levels of fees, the Board determined that each Fund's fee arrangement with the Advisor continues to provide benefits through the Expense Limitation Agreements and that, at the Funds' current and projected asset levels for the next year, each Fund's arrangements with the Advisor is fair and reasonable.

The Advisor's practices regarding brokerage and portfolio transactions. In this regard, the Board considered the Advisor's standards, and performance in utilizing those standards, to seek best execution for Fund portfolio transactions, including the use of alternative markets (e.g., direct purchases from issuers or underwriters or, as to equity securities, "third market" for listed securities and principal market makers for over-the-counter ("OTC") securities). The Board noted that the fixed income portfolio transactions of the Fixed Income Fund and the Small Cap Value Fund are normally principal transactions executed in OTC markets on a net basis. The Board also considered the historical portfolio turnover rates for the Fixed Income Fund and the Small Cap Value Fund; the process by which evaluations are made of the overall reasonableness of commissions paid; the method and basis for selecting and evaluating the broker-dealers used; any anticipated allocation of portfolio business to persons affiliated with the Advisor; and the extent to which the Funds allocate portfolio business to broker-dealers who provide research, statistical or other services (i.e., "soft dollars"). After further review and discussion, the Board determined that the Advisor's practices regarding brokerage and portfolio transactions are satisfactory.

Possible conflicts of interest. In evaluating the possibility for conflicts of interest, the Board considered such matters as the experience and abilities of the advisory personnel assigned to the Fixed Income Fund and the Small Cap Value Fund; the basis of decisions to buy or sell securities for the Funds and/or the Advisor's other accounts; the method for

the bunching of portfolio securities transactions; and the substance and administration of the Advisor's code of ethics. Following further consideration and discussion, the Board found the Advisor's standards and practices relating to the identification and mitigation of potential conflicts of interests to be satisfactory.

Conclusion. After full consideration of the above factors as well as other factors, the Board unanimously concluded that continuance of the Investment Advisory Agreements was in the best interests of the Fixed Income Fund, the Small Cap Value Fund, and their respective shareholders.
